EDUCATION

Bachelor of Science in Computer Science

Expected May 2027

University of Houston, Houston, Texas

GPA: 3.924

Relevant Coursework: Data Structures, Algorithms, Statistics, Database Systems, Data Science and ML

WORK EXPERIENCE

Generative AI & LLM Intern, Ideabytes Inc.

May 2025 – July 2025

- Benchmarked and analyzed multiple open-source LLMs on company-provided hardware to identify optimal models based on inference speed, resource utilization, and response quality.
- Engineered a real-time voice assistant using local LLMs and speech-processing pipelines.
- Built Retrieval Augmented Generation (RAG) systems that enabled LLMs to answer questions using company documents and internal knowledge bases.

Mathematics Tutor, University of Houston

Aug 2024 – May 2026

- Tutor 5–10 students daily in Pre-Calculus, Calculus I & II, Statistics, and Engineering Math.
- Strengthen students' problem-solving abilities and conceptual understanding through adaptive teaching.
- Boost student confidence and academic performance by tailoring sessions to diverse learning styles.

RESEARCH EXPERIENCE

Undergraduate Researcher, University of Houston — Advised by Prof. Sen Lin

Jan 2026 – Present

Investigating whether world models can be applied to time-series forecasting scenarios.

- Awarded a competitive \$4,000 Summer Undergraduate Research Fellowship (SURF) for world-model research.
- Built a PyTorch implementation of DreamerV3's RSSM for univariate and multivariate time-series forecasting.
- Developed a rolling-origin forecasting method that reduced 120-step forecast MSE from 0.93 to 0.18.
- Achieved up to 20× lower forecasting error than naive baselines on structured signals.

PROJECT EXPERIENCE

MEDIC(AIDS) — Beginners Track (Rice Datathon 2026)

Jan 2026

- 1st place (\$200 prize) as part of a 4-member team by analyzing AIDS clinical trial data and predicting treatment outcomes.
- Achieved 76.4% accuracy predicting AIDS treatment outcomes using CD4/CD8 immune cell counts.
- Performed EDA + feature engineering (Δ CD4/ Δ CD8, CD4:CD8 ratio) to improve signal and interpretability.
- Applied Kaplan–Meier survival analysis and log-rank testing to validate treatment-history impact ($p < 0.0001$).

Watt Warriors — Plastic Waste Detection (Coogs for Energy Hackathon 2025)

Nov 2025

- 3rd place (\$1,500 prize) as part of a 6-member team by delivering an ML-based plastic detection prototype.
- Trained a supervised computer vision classifier on labeled RGB images, architected for future RGB + NIR fusion.
- Verified the effectiveness of an ML-based material classification pipeline for sustainability and energy applications.

LEADERSHIP EXPERIENCE

Events Coordinator, IEEE-UH

Aug 2025 – Jan 2026

- Manage logistics including room reservations, scheduling, and equipment.
- Collaborate with other student organizations to co-host events and expand participation.
- Strengthened leadership and communication skills by supporting events with 100+ attendees.

SKILLS

- Programming:** C++, Python, SQL, JavaScript
- Web:** HTML, CSS
- ML / Data Science:** PyTorch, scikit-learn, pandas, NumPy, Matplotlib
- Concepts:** LLMs, RAG, Computer Vision, Time-Series Forecasting, Statistical Analysis
- Version Control & AI Tools:** Git/GitHub, Claude Code, Codex

ACHIEVEMENTS

- Academic Excellence Scholarship
- NSM Dean's Distinguished Scholar's List

2024–2026

Fall 2023–Spring 2026
